Security & Compliance

Curately.AI

Born Secure. Built for Enterprise Trust.

Most SaaS companies add security later. **Curately was built with it from day one.** From launch, Curately maintained ISO 27001, ISO 27701, and SOC 2 certifications, an achievement held by fewer than **10% of early-stage SaaS companies**. In 2025, Curately successfully completed recertification across all three frameworks, reaffirming our commitment to protecting enterprise data at the highest standard.

CERTIFICATIONS

Certifications & Compliance Frameworks

Curately adheres to globally recognized security and privacy standards, validated through rigorous third-party audits, independent testing, and ongoing operational review.

Security & Privacy Certifications

SOC 2

System and Organization Controls for security, availability, and confidentiality.

SOC 1

Controls over financial reporting and internal processes.

ISO 27001

Information Security Management System — the global gold standard.

ISO 27701

Privacy Information Management — extending ISO 27001 for data privacy.

Regulatory Compliance

GDPR

General Data Protection Regulation — EU-wide privacy and data protection law.

CCPA

California Consumer Privacy Act — enforceable rights for consumer data in California.

All certifications require rigorous third-party audits, control validation, and ongoing operational transparency.

ENTERPRISE VALUE

What This Means for Enterprise Customers

Curately's certifications represent independently verified controls that enterprise security and compliance teams can rely on.

Independent Audits

External auditors review infrastructure, policies, and controls to verify every compliance requirement.

Security by Design

Information security and privacy protections are embedded into product architecture.

Continuous Monitoring

Certification demands ongoing testing, risk assessment, and security program maturity reviews.

Enterprise-Grade Trust

Customers rely on validated controls to protect sensitive data in production environments.

Our Security Philosophy

At Curately, protecting customer data is part of our operational DNA. Our certifications and recertifications demonstrate a sustained commitment to **transparency, accountability, and enterprise-grade security**.
